C++ Based Reminder System

Presented by Group 2

PURPOSE

ugm.ac.id

Merakyat, Mandiri, Berkelanjutan | Inclusive, Self-Reliant, Sustainable

Problem

Many people in their daily lives that miss some tasks, events, or any deadlines due their poor time management and an unstructured schedule. This can cause many problems in social life, education, and even career.

Solution

Our group find a solution, we devaloping a lightweight time reminder program to help users record, manage, and receive timely alerts for their daily activity. Users can use this as a reminder for tasks, events, and more daily schedules such as taking medicine or vitamins.

FEATURE

ugm.ac.id

Merakyat, Mandiri, Berkelanjutan | Inclusive, Self-Reliant, Sustainable

Main Reminder

The core feature of this program, user could add reminder and manage it

Groupings

user could put a specific reminder into a group that they could name, so it could be more organized and would not become messy.

Prioritization Tier

There will be 3 classes of priority that user could put in their reminder in here:

- **Red**: indicate that this reminder is very important and very urgent.
- **Yellow**, This indicate that this reminder is either important but not urgent or vice versa.
- **Green**, this is a reminder that is not urgent and not that important.

ADVANTAGES AND DISADVANTAGES

ugm.ac.id

Merakyat, Mandiri, Berkelanjutan | Inclusive, Self-Reliant, Sustainable

Advantages

- *Fast because it uses C++ which uses few RAM.*
- *Equipped with a deadline system.*
- *Offline, so it can be used at any time.*

Disadvantages

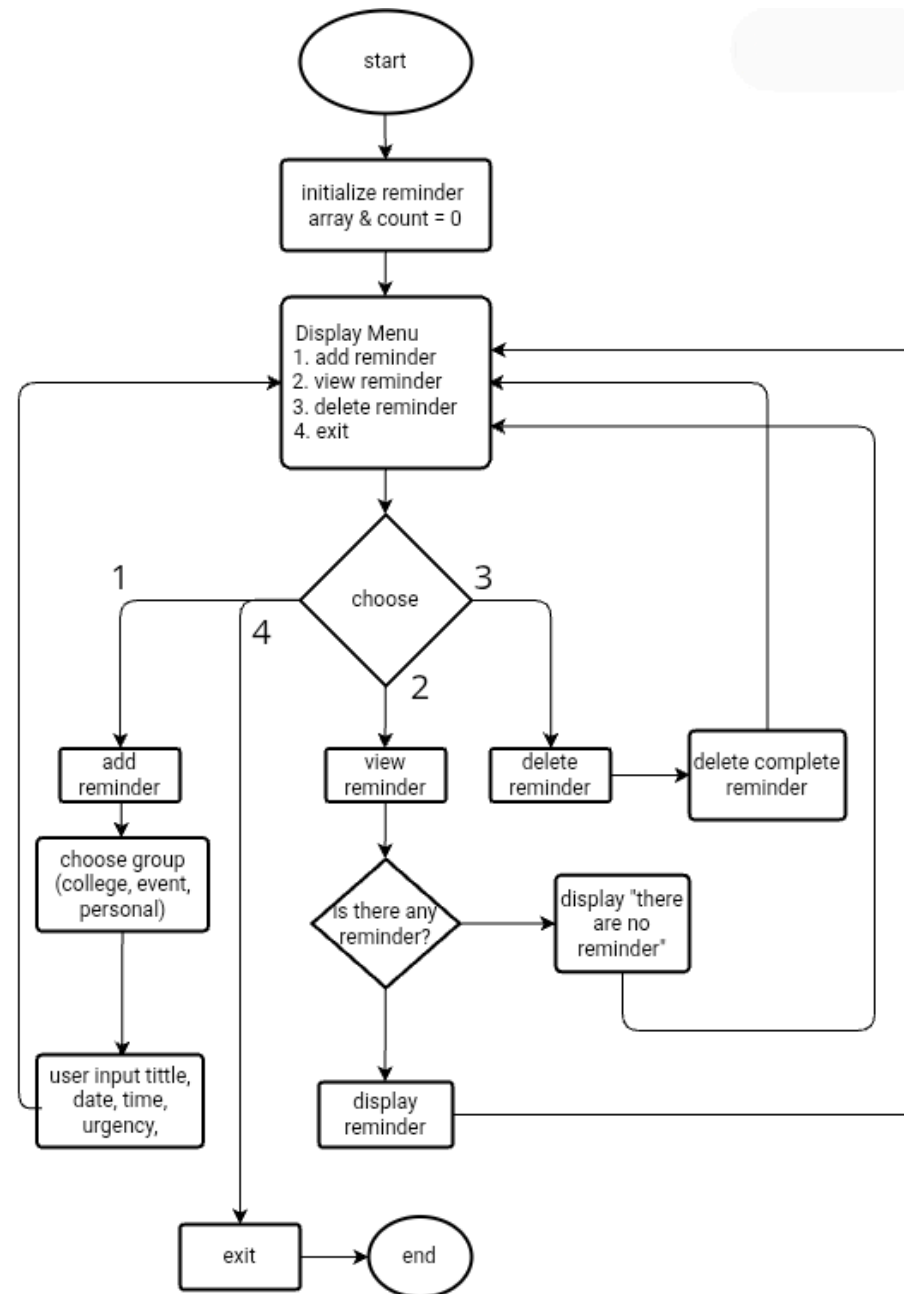

- *Complex development due to C++ various syntax.*
- *No cloud synchronization across device.*
- *Less suitable for group user, this program is aimed for individual people.*

FLOWCHART

ugm.ac.id

Merakyat, Mandiri, Berkelanjutan | Inclusive, Self-Reliant, Sustainable

CONCLUSION

ugm.ac.id

Merakyat, Mandiri, Berkelanjutan | Inclusive, Self-Reliant, Sustainable

Conclusion

In conclusion, this reminder program made in C++ offers a simple, fast and easy to use way to keep track of everyday tasks and deadlines.
